## LADIES RECYCLIGHT PADDED JACKET

A lightweight and water resistant padded jacket made from 100% recycled nylon and polyester for a great outerwear solution. Horizontal stitching across the jacket creates baffles to ensure even distribution of the insulation within. This women's 'Recyclight' jacket is filled with recycled synthetic down for warmth, whilst also being lightweight enough to fold away in its own stuff-sack. A full zip-through style with two zipped side pockets and a handy open pocket to the inner lining. A zip in the inner lining gives full embroidery access, making for a great corporate or teamwear solution that can be branded accordingly. The fashionable nature of this jacket also means it can be worn as an everyday leisurewear style for women.
